

APPLICATION

GenAssist® is a powerful engine management application in our EcoVerse™ reduced emission suite aiding drillers with optimal engine load supervision. Whether in advisory or automated modes, GenAssist® enhances engine management while further enabling dual-fuel substitution rates. This application limits driller distraction and provides insights and assistance for overall sustainable operational efficiency.

FEATURES

- Available in both Automated and Advisory modes
- An application available through our CORTEX® Automation platform
- Interactive dashboard
- Integrated into existing HMI
- Savings logic integrated into PTEN+ Portal

BENEFITS

- Reduces overall genset run hours
- No additional equipment is needed
- Advisory mode aids in the training of best practices
- Increases average genset load
- Improves dual-fuel substitution rates
