

# PTEN+ OPTIMIZATION ENGINEERING

Bridging the Gap for Data Driven Decisions

Our **PTEN+ Performance Optimization** team bridges the gap for data driven decisions. Our team works directly with our customers to identify the objectives and potential challenges of the specific project, and leverages data to better understand improvement opportunities. Our team is fully integrated with operations in the field as well as the PTEN Performance Center. This additional oversight ensures performance is optimized real-time and customer expectations are met.

## Features

Real-Time Monitoring	On-site Vists	Efficiency Insights	Operations Integration
<p>Monitor rig metrics / performance issues daily or in real-time</p> <p>Develop standardized procedures for each rig</p>	<p>Location visits on a regular basis (alternating week field / week office schedule)</p>	<p>Leverage data center tools to better understand operations and potential improvements</p>	<p>Customer Engineering Liaison to integrate fully with the operations team</p>

## Benefits

**Maximize Engine Efficiency** – Optimize power management to reduce fuel costs and extend engine life

**Streamline ESG Compliance** – Easily access accurate emissions data for sustainability reporting

**Enhance Operational Performance** – Compare rigs to benchmark performance and drive continuous improvement
